

PRINT FROM THE CLOUD **SECURELY** VIA YOUR **DEVICE**

SECURELY PRINT FROM THE CLOUD WITH KYOCERA CLOUD PRINT

Printing via the Cloud or with services such as Google Cloud Print is becoming increasingly popular as companies make the move from physical to Cloud storage and Cloud environments. However, how do companies monitor what their employees are printing via the Cloud? And most importantly, how do they ensure the security of their printed documents?

KYOCERA Cloud Print not only provides a direct connection to Google Cloud Print, and as such Google Docs and Google Apps, it also offers organisations the ability to introduce user authentication and provide single sign-on to the device. Increasing the visibility and security of printed documents within the organisation.

BUSINESS CHALLENGES

- > My office is moving towards the Cloud – **How can I introduce cloud printing that is secure and that I can monitor?**
- > Data security and user authentication is crucial to my business – **are Cloud services really secure?**

YOUR ADVANTAGES WITH CLOUD PRINT

- > **Print via the Cloud:** You can easily print your documents via Google Docs and Google Apps to any KYOCERA HyPAS™ enabled device.
- > **Data security and user authentication:** Ensure document security and user tracking with user authentication and single sign-on.

KYOCERA HYPAS™ - TAILOR YOUR DEVICE TO SUIT YOUR BUSINESS

HyPAS™

HyPAS™ is KYOCERA's platform to develop custom business applications. These can run embedded inside the device and extend the device's functionality according to each user's needs. For powerful functionality, applications can connect to external server applications and integrate the device perfectly into the company's workflows. With HyPAS™, we can meet individual customer requirements and provide the right solution for your business.

FEATURES & SPECIFICATIONS

KYOCERA Cloud Print provides a secure way to print via Cloud services such as Google Cloud Print. Through integrating with user authentication solutions such as PaperCut, Equitrac and Safecom, Cloud Print enables both user authentication and single sign-on, meaning users can print from their Google Docs and Apps via the cloud to any KYOCERA HyPAS™ enabled device quickly and securely.

Print from the Cloud – print your documents directly from Google Docs or Google Apps on a PC, smartphone or tablet.

Single sign-on – integrate existing user authentication with Cloud Print to provide single sign-on and seamlessly print documents via the Cloud.

Document security – documents can be sent to print via the Cloud but will not release until the user signs into the device via user authentication.

PRINT ANYWHERE & EVERYWHERE

Mobile devices, such as smartphones and tablet devices, have changed the way we work and constantly give rise to new business challenges. Business life has become a fast-paced world, where documents are increasingly stored or even shared in a Cloud. KYOCERA can support all your needs involving mobile and Cloud services, whether it is printing from a mobile device or from the Cloud, as well as ensuring the security of mobile solutions.

SUPPORTED SYSTEMS

Compatible with all HyPAS™-enabled MFPs
All TASKalfa i devices
Compatible with all HyPAS™-capable MFPs

Note that HyPAS™-enabled devices require a compatible external memory card.
